

1 change 1 million dollars saved

Why an **AI-assisted reassessment** was the smart choice for Macomb County.

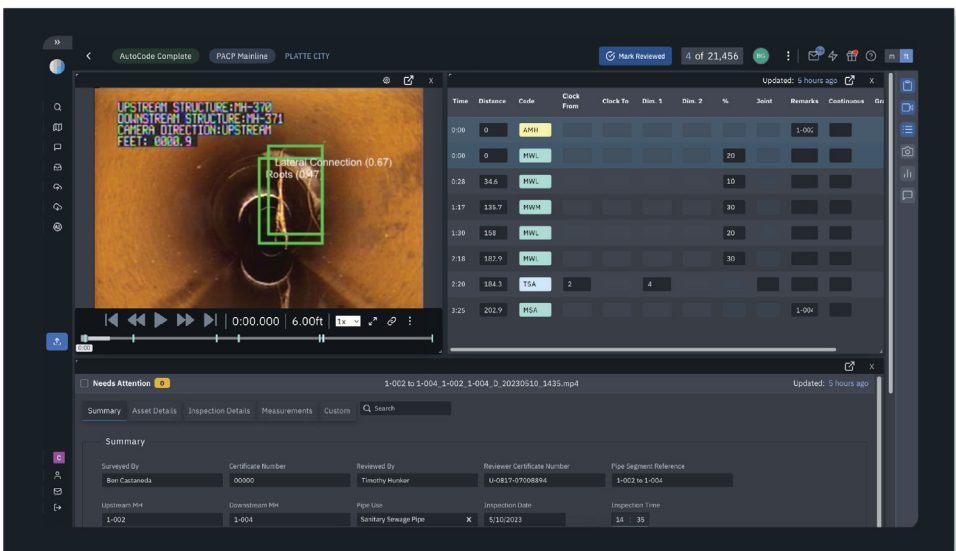

In order to determine the health and integrity of its sewer system, Macomb County enlisted an engineering firm to perform assessments. Macomb County's internal team questioned the results—then took the matter into their own hands.

Better data. Better results.

To garner a fresh look at the data, Macomb County used SewerAI, the leading platform for infrastructure management. The AI-powered solution garnered substantial savings and uncovered critical issues.

“Questioning some of the recommendations we received from a recent assessment project, we turned to SewerAI’s AutoCode™ to reassess the data. Their swift action not only saved us over a million dollars in repairs previously recommended as immediate, but also uncovered critical defects within 24 hours of analysis—information missed in the original assessment. Working with SewerAI has been incredibly satisfying, and we’re eagerly anticipating future collaborations.”

— Vincent Astorino,
Operations Director at Macomb County Public Works

SewerAI AutoCode™ example image

The #1 pipe inspection software.

Half of our nation's sewer infrastructure is failing. It's a 1.6 trillion-dollar problem that spans more than six billion feet of sewer pipe, requiring wastewater professionals to continually assess their infrastructure.

Super-sized problems require superhuman help.

SewerAI is the only wastewater platform built by wastewater professionals. SewerAI's leading edge technology allows wastewater professionals to do their jobs with superhuman speed and accuracy, while dramatically increasing productivity.

2x faster
field productivity

3,000+ feet
of pipe inspected per day

6x faster
in-office assessment
and annotations

Meets NASSCO, PACP™ and
other industry standards

Keeping workflows flowing-faster.

With just one hour of training and simple, seamless software integration, SewerAI accelerates project timelines, reduces labor hours, and frees up teams to do what they do best—all while decreasing cost. Small wonder SewerAI is trusted by communities across the country.

→ **40+ Million** Linear Feet Assessed

→ **40,000** Manholes Assessed

→ **100,000,000 ft** of Pipe Data Managed
